CE

ALL-IN-ONE TOOL

- Activate Solenoids
- Verify 24v Clock Output
- Detect Short/Open Wires
- Chatter Solenoids
- Check Solenoid Condition
- ID Wire with Tone/Probe

COUNT ON IT

The Pro48K TechTool Kit is a complete, portable, low cost, battery operated irrigation system diagnostic kit. The Pro48K combines several testers into one, creating a powerful tool that any technician can afford. The Pro48 TechTool incorporates a solenoid activator to hold valves open; a chatterer to locate lost valves; a continuity checker to identify cut or shorted wires or solenoids; and a 24 VAC detector to ensure proper clock power output. Together with the Pro210 Probe, the Pro48 can transmit a tracing tone and identify wires using traditional tone/probe methods. Operation is simple as LEDs indicate tests and conditions. Both units are kept in the included Pro21 carrying case. Truly a workhorse product for any landscape professional.

Pro48K SPECIFICATIONS

Pro 48

Power Requirements: Two 9V Alkaline batteries (not included)
Battery Life: 4 hours continuous chatter
Voltage Output: 36VDC peak
Voltage Protection: 28VAC

Pro210

Powerful Speaker
One-button Operation
Adjustable Volume Control
Power Requirements: 9V alkaline (not included)
